

CONTENTS

<i>Foreword by Professor Dame Sue Black</i>	7
<i>Aims and structure of the book</i>	8
<i>The role of the surgeon</i>	10
<i>Abbreviations and acronyms</i>	12

Section I: Access to 'vital structures' 13

Neck and torso	16
Upper limb	32
Lower limb	38
The head	50

Section II: Initial actions 53

Maintenance of the airway	56
Control of haemorrhage	59
Control of contamination 'from within'	80
Control of contamination 'from without'	91
Control of intracranial pressure	108

Section III: Decision-making 111

Casualties who are exsanguinating	116
Casualties who have exsanguinated	125
Casualties with ongoing major haemorrhage	126
Casualties who are haemodynamically stable	128

Section IV: Closing the wound 139

Definitive closure of a temporarily closed laparotomy incision	143
Basic soft tissue closure	144
Holding the bone	148
Tendon and nerve repair	158
Soft-tissue closure with flaps	159
Overviews of limb wounds	172

Section V: Appendices 177

<i>Appendix 1: Securing an intercostal drain</i>	178
<i>Appendix 2: Creating a feeding jejunostomy</i>	179
<i>Appendix 3: Management of burns</i>	180
<i>Appendix 4: Holding fractures of the limbs</i>	186
<i>Appendix 5: Management of postpartum haemorrhage</i>	188

<i>Suggested reading</i>	190
<i>Index</i>	191

SECTION I

Access to 'vital structures'

INTRODUCTION	15
THE NECK & TORSO	16
The heart, aorta & origin of the great vessels	16
The lungs, carina of trachea & main bronchi	16
The thoracic oesophagus	16
The common carotid artery and subclavian arteries in the neck	18
The cervical trachea & oesophagus	18
The liver and retrohepatic inferior vena cava	20
The spleen	20
The retroperitoneal vessels	22
The pancreas and duodenum	28
THE UPPER LIMB	32
Overview of the upper limb arteries	32
The distal subclavian & axillary arteries	34
The brachial artery	35
Arteries around the cubital fossa	36
The radial & ulnar arteries in the forearm	37
THE LOWER LIMB	38
Overview of the lower limb arteries	38
The femoral artery	38
The popliteal artery in the thigh	42
The popliteal artery in the leg	45
The anterior tibial artery	46
The posterior tibial and peroneal arteries	48
THE HEAD	50
The brain	

SECTION II

Initial Actions

INTRODUCTION	55
MAINTENANCE OF AIRWAY	56
Facial injuries	56
The large airways and diaphragm	58
CONTROL OF HAEMORRHAGE	59
Thoracotomy for intrathoracic bleeding	59
Laparotomy for intra-abdominal bleeding	60
Arteries and veins:	62
— Direct pressure	62
— Vascular repair	63
— Shunts and ligation	70
Fasciotomy	71
The heart	72
The lungs	74
The liver	76
The spleen	78
The kidneys	79
CONTROL OF CONTAMINATION 'FROM WITHIN'	80
Bowel anastomosis	80
The oesophagus and stomach	82
The duodenum and pancreas	84
The small bowel	86
The colon	88
The lower urinary tract	90
CONTROL OF CONTAMINATION 'FROM WITHOUT'	91
Soft tissue and bone — in general	91
The limbs	92
— Wound management	92
— Wound excision process	94
— Dressing the wound	97
— Holding the bone at the initial operation	98
— Upper-limb amputations	99
— Lower-limb amputations	100

(continues overpage)

CONTROL OF CONTAMINATION 'FROM WITHOUT' *(continued)*

The face	104
The head	106

CONTROL OF INTRACRANIAL PRESSURE **108**

The brain — Decompression of a track haematoma	108
--	-----

SECTION III

Decision Making

INTRODUCTION	113
CASUALTIES WITH EXSANGUINATING WOUNDS	116
Thoracic cavity wounds	116
Cardiac tamponade	118
Abdominal cavity wounds	120
Torso wounds – which cavity?	122
Zone 1 neck wounds	123
Lower-limb wounds	124
CASUALTIES WHO HAVE EXSANGUINATED	125
CASUALTIES WITH ONGOING MAJOR HAEMORRHAGE	126
HAEMODYNAMICALLY STABLE CASUALTIES	128
Thoracic cavity wounds	128
Abdominal cavity wounds	129
Neck wounds	132
Face & head wounds	133
Limb wounds	13

SECTION IV

Closing the wound

INTRODUCTION	141
DEFINITIVE CLOSURE OF A LAPAROTOMY INCISION	143
BASIC SOFT TISSUE CLOSURE OF WOUNDS LEFT OPEN AT INITIAL OPERATION	144
HOLDING THE BONE	148
General rules	148
Femoral fractures	150
Tibial fractures	154
Fractures of the upper limb	156
TENDON AND NERVE REPAIR	158
PRECONDITIONS FOR SOFT TISSUE CLOSURE WITH A FLAP	159
FLAPS FOR COVERAGE OF LEG WOUNDS	160
Upper-third defects	160
Middle-third defects	161
Lower-third defects	164
Heel defects	165
OTHER USEFUL FLAPS	166
Latissimus dorsi flap	166
Pectoralis major flap	168
Groin flap	170
OVERVIEW—CLOSURE OF LIMB WOUNDS	172

SECTION V

Appendices

APPENDIX 1: Securing an intercostal drain (ICD)	178
APPENDIX 2: Creating a feeding jejunostomy	179
APPENDIX 3: Management of burns	180
APPENDIX 4: Holding limb fractures	186
APPENDIX 5: Management of postpartum haemorrhage	188
